

MAY NEWSLETTER

We hope you had a great April and are looking forward to May! This month we are talking about considering the switch to full synthetic oil for your vehicle's maintenance. A recent analysis showed that over two-thirds of our clients preferred full synthetic oil due to its extended intervals between oil changes and meeting the manufacturer's requirements. The cost per mileage for full synthetic oil is essentially the same as conventional oil changes, making it a worthwhile investment in the long run. Full synthetic oil also allows you to maintain regular tire rotations, ensuring the longevity of your vehicle's tires and keeping you safe on the road. Contact us to make the switch and enjoy the benefits of better quality oil, extended intervals, and fewer visits to the shop.

Service Advisor Training

If we are going to provide you service how it should be, we have to make sure that we're always improving our service to keep it up to standard! Recently, we had the opportunity to take service advisor training to make sure our team has the skills and tools they need to get the job done right. As always, it's crucial that our Honest Wrenches Family treats you like one of our own, so we strive to make sure we're always at our best.

ALL ABOUT APRIL

Shop Foreman 20 Group Meetings

Our service advisors aren't the only ones hitting the books and taking notes! To make sure everything going on in the shop is working smoothly and safely, Shop Foremen like our very own Brian took on the task of training so that we can deliver the results that our service advisors rely on.

More Training!

It was a very academic April with a huge chunk of our team taking the chance to learn and grow as the Honest Wrenches Family grows better and stronger by the day.
